

NORTH OSSETIA MEDICAL UNIVERSITY

Russia

About Russia

Russia is a land of superlatives. By far the world's largest country, it covers nearly twice the territory of Canada, the second largest. It is the largest country in the world by area, spanning more than one-eighth of the Earth's inhabited land area, stretching eleven time zones, and bordering 16 sovereign nations.

The Russian landscape varies from desert to frozen coastline, tall mountains to giant marshes. Much of Russia is made up of rolling, treeless plains called steppes. Siberia, which occupies three-quarters of Russia, is dominated by sprawling pine forests called taigas.

Russia has about 100,000 rivers, including some of the longest and most powerful in the world. It also has many lakes, including Europe's two largest: Ladoga and Onega. Lake Baikal in Siberia contains more water than any other lake on Earth.

Its forests, steppes, and tundra's provide habitat for many rare animals, including Asiatic black bears, snow leopards, polar bears, and small, rabbit-like mammals called pikas.

Why to Choose Russia

- The standard of the medical universities in Russia is very high with a very low cost of living.
- The tuition fee of MBBS in the medical universities of Russia is very affordable as compared to other countries.
- No Entrance exam
- No Donation
- Easy & Low Cost Admission Procedure
- Subsidized course fees
- Medical Schools have Latest Devices
- Excellent Result in MCI Screening Test
- Degrees Recognized Worldwide
- Easy Visa Process
- All Russian Universities are Government Universities of Russia
- Students are successfully placed in India, Australia, Canada, USA, UK and other major countries

About North Ossetia Medical university

NOSMA was founded in 1939. The graduates of NOSMA successfully work not only in the republic but in all regions of Russian Federation and abroad too. At the 41 chairs of the academy work 384 professors and teachers: 53 Doctors of Medical Sciences, 34 Professors, 242 Candidates of Medical Sciences, and 62 Assistant Doctors.

North - Ossetia State Medical Academy is located in the town Vladikavkaz one of the most beautiful towns of the Large Caucasian Mountains. The nature of the North - Ossetia is picturesque and original. Here we can see magnificent mountains, capped with snow and glaciers, green alpine meadows and spontaneous rivers.

There are 6 faculties in the academy: medical, pediatric, Dental, pharmaceutical, medico -

preventive and the faculty of post-graduate education (internship, residency, post graduate course).

The faculty of post-graduate education

is preparing to graduate in 15 specialties, clinical

residency in 31 specialties. Annually specialization and advanced training in 25 specialties is conducted in academy. In NOSMA operates department of pre-university training and further education for foreigners.

Over 600000 books written by Russian and foreign authors are available at average in a university library. The library is connected with the World Med Line System, where all information regarding the latest findings in Medical field are updated. It has three reading halls with a capacity of more than 200 seats.

NOSMA has its own clinic and stomatological polyclinic with modern equipment.

Clinical chairs of the academy are based in large

healthcare institutions of the republic, the bed space of which is more than 6300 locations. Along with the professional training we have all the conditions for research work. There is research

laboratory in the Academy and Institute of biomedical research of Vladikavkaz scientific center of Russian Academy of Sciences and of RNO-Alaïna Government. In the Academy operates Students' Scientific Society and association of young scientists. Students of the Academy

take part in the international conferences and workshops. Students have access to a library with rich fund of special literature and fiction numbering more than 428000 copies of publications. In the library operates an electronic reading room equipped with computers with Internet access. In the Academy is opened the Testing center, the center of the practical training, which is designed for classroom and extracurricular self-study and is equipped with modern equipment: dummies, phantoms, clinical examination of the patient simulators. There was created multimedia class designed to show care

educational films, video collection and presentation.
